

Middle School Oral Presentation

Term 3, 2019

Your task is to research and prepare an oral presentation to be presented in front of your class in week 8. Your teacher will tell you which day you will be doing your presentation.

This term we have been learning about the difference between needs and wants and how an economy works. For your oral presentation you need to choose a service to research. You may either do a general occupation (eg a mechanic, baker) or a specific business (eg Mammi Motors, Bakers Delight).

You could talk about:

- What service do they provide?
- Who do they provide it to?
- What training is required?
- What equipment do they need?
- What facilities do they need?

Remember to research your information and put it into your own words. You may have notes or prompt cards to help you. It would be good if you could also have some form of visual aid such as a poster, power point, props etc.

Your presentation needs to go for 2 minutes. You should practise at home and time yourself.

If you need any help please ask your teacher.
